**MOLECULAR DIAGNOSTICS:  
Fast Track Diagnostics Research Use Only (RUO)**

**Fast Track Diagnostics Luxembourg S.à r.l.**

August 2021

Dear Valued Customer,

At Fast Track Diagnostics Luxembourg S.à r.l (FTD), a Siemens Healthineers company, we continuously review our product portfolio in order to be able to deliver you with optimal molecular diagnostics solutions.

As a result of our ongoing portfolio assessment, a decision has been made to discontinue commercialization of several 32-test formatted kits of our Research Use Only (RUO) product line. **The 64-test formatted kits will continue to be made available.** In addition, both the 32-test and 64-test formatted kits for the FTD Internal control EAV (RUO) will be discontinued. These decisions have been made due to a much higher demand for the 64-test formatted kit as well as a low global demand for the FTD Internal control EAV kit. Streamlining our product offering to better match customer demand will allow us to continue to provide you with high-quality and efficient service.

Table 1 lists the FTD RUO kits that will be discontinued. A last time order may be submitted for these kits up until October 1, 2021.

We apologize for the inconvenience this may cause to your laboratory and/or end-use customers and hope that you will consider moving to the 64-test format for these kits. Your Siemens Healthineers Representative or Siemens Healthineers Business Partner will contact you to discuss this option.

If you have any questions or concerns, we encourage you to please contact your local Siemens Healthineers representative directly.

We appreciate your business and thank you for choosing Siemens Healthineers as your partner.

Sincerely,
